

## IST 263 Project Milestone 4 – Wireframes

**Name:** James Estabrook

**Description:**

A golf cart rental company.

**Research:**

Write down the urls of three websites you looked at to research layout for the type of site you are creating. For example, if I was creating an auction website, I might look at pages on <https://www.ebay.com/>.

url1	<a href="http://peaksislandcarts.com/">http://peaksislandcarts.com/</a>
url2	<a href="https://goudreauandsonsgolfcars.com/rentals">https://goudreauandsonsgolfcars.com/rentals</a>
url3	<a href="https://www.mikescarts.com/">https://www.mikescarts.com/</a>

**Wireframes:**

Use MockFlow or another diagraming software to create layouts for your pages. Consider the following:

1. Where is your navigation going to be located on every page.
2. At the top and it will scroll with page
3. Will you need a footer?
4. Yes
5. How can you make a layout that is visually interesting and helps communicate your site content?
6. Good colors and simple
7. Don't forget you must have at least 2 distinctly different page layouts.

**Paste Your 3 Page Layouts Below**
